FINANCIAL AND COMMERCIAL

MONDAY, March 26-6 P. M. The stock market has been on the whole firm but not very active to-day. The general impression, neverthe-less, is that the Finance bill passed by the House must have an effect in restoring confidence in values and pro-moting speculation in Wall street, even if it falls to do so re, for as a contraction of the currency to laewhere, for as a contraction of the currency to ny extent worth mentioning is prohibited by the bill in question a large and constant accumulation of anable funds, at low rates of interest, must contro here, such of which, unless used for speculative purposes, till be left unemployed. The national banks will, uring the operation of the bill, add about forty

during the operation of the bill, and about forty millions more to the mass of paper money adoes, and this unfortunately will be inflation of the worst kind. The Treasury, moreover, will be so absolutely dependent upon an easy money market that it is very doubtful whether the Secretary will be able to avail himself of the extremely limited without the contract which the bill gives him and the ity to contract which the bill gives him and the sement of which by the Senate is as yet uncertain. At the early session of the open board Michigan outhern (sales 2,600) sold at 81% a %, New York Contral 92%, Eric 80%, Hudson River (s. 8) 109%, Reading 101%, Cleveland and Pittaburg 79%, Rock Island 117 a %, North-Cleveland and Pittaburg 79%, Rock Island 117 a %, Northwestern 27%, preferred 56. At the first regular board the market was firm, but dull. Eric closed 1% higher than at the half-nest two board on Saturday, Hudson River %, Reading %, Michigan Bouthern %, Cleveland and Pittaburg %, Fort Wayne %. New York Central was % lower. Government securities were firm. Coupon on-fortics advanced %, seven-thirty notes of the second series %.

at the one o'clock sessions prices were a fraction lower, and subsequently there was a further decline of % a % on a portion of the list, but at the half-past two board the market had a firmer tone. Quotations were, however, lower than at the first regular board. Eric showed a decline of %, Hudson River %, Reading %, Michigan Southern %, Cleveland and Pitts-burg %, Northwestern preferred %, Rock Island %, Fort Wayne %. Mariposa preferred sold at 18%. Govern-ment securities were inactive but firm. Coupon ten-for-

a very firm undertone, although the volume of business was not heavy. Michigan Southern sold at 81% a 3%, Cleveland and Pittsburg 79%, Eric 82, a 81%, Reading 101% (s. 3), Rock Island 116% (b. 3), Northwestern pre erred 56, Fort Wayne 93, Comberland 1334. Afterwards there was no material change, and at 14, Northwestern 271/2 a 14, proferred 56 a 14, Fort

The money market is without change, the demand for loans from the Stock Exchange being promptly met at five per cent, while first class commercial paper is freely discounted at 6% a 7 per cent. The statement of the associated banks for the week is favorable, and there is every probability of prolonged monetary cane at this centre. The legal tender notes have increased \$1,093,293, and the deposits \$429,538. An increase of \$923,140 in the loans indicates a little more activity in the discount line. The specie has decreased \$1,069,591, owing to withdrawals for customs duties, and there is an unimportant decrease of \$50,645 in the circulation. The extreme abundance of monetary facilities here is shown by the high quotations for seven-thirty notes, each series of which sold this merning at 100%. The flow of currency from the West continues, and exchange on the East at Chicage is reported firm at par, ociated banks for the week is favorable, and there is change on the East at Chicage is reported firm at par, buying, and 1-10 premium selling, the bankers there being under the necessity of expressing legal tenders al-most daily to New York. The discount rate at the banks is steady at ten per cent per annum.

Considering that New York is the real and ac-

considering that New York is the real and as-thewledged financial contre of the entire country, if a somewhat surprising that there is not more consolidated desarted power here. The banks are only nosingally united through the Clearing House for the purpose of facilitating their daily exchanges, and practically there is no unity among them unless on special occasions when dub together and apppoint a care measure rate against or advocate some particular measure Now, it seems perfectly feasible for the banks of this city to agree upon and observe such a unity of action as would virtually make the Clearing House a power equal to that of the combined strength of the banks belonging to it, and give it a sway similar to that of the Bank of England. The members of the Clearing House should meet weekly, like the directors of the Bank of England, and fix a minimum rate of discount to be strictly adhered to till raised or lowered by a majority vote of the association. This would exert a material influence in regulating the tocal exchanges and give New York a more undisputed control of the monetary affairs of the nation than it now possesses, simply because our banking system tacks what the Fenians we suppose would call a head centre. Every bank is an isolated fragment of what, joined together, might become "one stupendous whole" in the absence of a United States bank, which, as experience has proved, it is not desirable to create. But a central monetary power we do require, and those banks which are quick and far sighted enough exert we reserve for another occasion.

ncy and after opening at 125% it closed firm at 126, porrowing demand from the "shorts" is so heavy that coin loans have been made all day at 1-16 a % per cent till to-morrow, no transaction having taken place below the former rate. The floating supply is notwithstanding large, but its insignificance in comparison with the amount sold by the bears may be inferred from the difference between the cash and regular price. The operators for a fall still retain control of the market, but operators for a fall still retain control of the market, but if they attempted to "covor" largely they could not avoid running it up flon themselves, and a sharp rise, followed by spasmod o fluctuations, would be the result, to the unsettlement of values and the disturbance of legitimate business, evils which the Treasury should have sought to guard against, instead of inviting by secretly tampering with the gold market. So important to the interests of the country, indeed, is this last question that Congress should immediately investigate and legislate upon it.

The foreign archance market, was firmer than at the

The foreign exchange market was firmer than at the end of last week, and as the day advanced an increasing disposition to buy was shown in view of the rising ten-dency of gold. The Supreme Court to-day decided in the case of the others, that a broker is chargeable with the tax on sales of securities made on his own account and for his own benefit, the same as on his commissions when setting for others. The Minnesota Legislature has passed a law for the adjustment of the old railread bonds. These bonds amount to something near \$2,500,000, issued to aid in the construction of railroads in that State, some six or seven years ago, since which time no interest has been paid on the same. The law recently passed, however, provides for the appointment of three commissioners, whose duty it is to ascertain the present whereabouts of said bonds, how much the holders paid for them, and, if a satisfactory arrangement can be made, now bonds are to be ex-

The Buffalo Street Railread Company is bankrupt, and its property is in the hands of a receiver. It is stated that the stock is entirely wiped out, and that there is not sufficient property left to pay the bondholders fifty cents on a dollar.
